Initial Fees	NA
Management Fee	0.25% excl. VAT
Performance Fees	NA
Fund Size	R 128,846,672.26

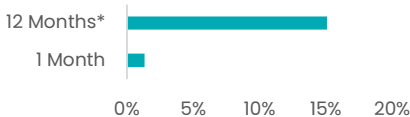

Portfolio Objective

The first objective of the portfolio is to deliver absolute (positive) returns over any rolling 1-year period. "Ti" defines the second objective, namely a targeted return of more than 10% per year over any rolling 5-year period. These objectives are achieved by allocating assets to a basket consisting mainly of alternative assets, diversified across sectors and companies. Conventional risk profiling will classify this investment as conservative, given the lack of volatility. Conversely, investments in alternative assets are often classified as aggressive / high risk in nature. We are of the opinion that the underlying instruments / assets, combined with our "Contract-for-Yield"TM - methodology, creates a predictable (low risk) outcome combined with an equity-like (higher risk) asset base.

Who This Investment May Be Suitable For

This investment is suitable for living annuity investors seeking strong growth of 13.91% per annum. As it is held within a living annuity, the growth is tax-free, making it an attractive option for those looking to preserve capital and draw a sustainable income over time.

Disclaimer

Unum Capital (Pty) Ltd is an Authorised Financial Services Provider, License No. 564. Investments into alternative investment products should be considered as medium to long term investments. The exposures indicated in the graphs may differ from time to time due to market movements, fund limitations and the portfolio manager's discretion. All information is product related, and is not intended to address the circumstances of any Financial Service Provider's (FSP) client. In terms of the Financial Advisory and Intermediary Services Act, FSP's should not provide advice to investors without appropriate risk analysis and after a thorough examination of a particular client's financial situation. The value of the portfolio may go down as well as up and past performance is not indicative of future performance. A full risk disclosure is available from Unum Capital. The information above is based on a backtested model portfolio, and excludes brokerage costs from trading.

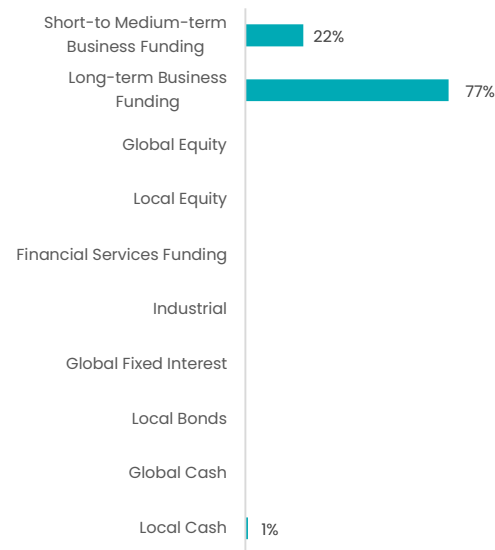

Risk profile

Why You May Consider This Fund

The fund delivers consistent returns with low volatility, but equity-like performance. This allows for better financial planning as well as sustainable income drawings exceeding what could be achieved in products with similar volatility profiles.

Asset allocation

Fund manager commentary

The fund gained 1.24% during September compared with a gain of 7.18% by the JSE Top40 and a growth of 2.46% by the benchmark. The fund remains fully invested in local debt and low-volatility, high predictability assets. During September both local and US equities appreciated following signs of easing inflation. The rand appreciated against the US\$ while local bonds appreciated by 1.99%.

Asset Allocation Defined

Industrials: Investments into South Africa's industrial sector and broader economy, excluding financials, oil & gas, and basic materials. This classification, for instance, includes agriculture. A typical investment would consist of exposure to the farming sector, particularly primary production such as crops, livestock, and essential agricultural inputs.

Financial services funding: Capital deployed into businesses operating within the financial sector, typically through unlisted debt or structured funding instruments. These investments offer stable, income-generating opportunities with strong underlying cash flows.

Long-term business funding: These instruments are unlisted long-term debt instruments from various issuers across multiple business sectors, including but not limited to financial services, local industrial, and local agricultural businesses. These instruments provide predictable income, inflation protection, and low correlation to traditional markets. A typical capital allocation would be in the SME lending sector, insurance, hospitality technology or food and beverage sector, supporting established businesses with growth and working capital funding. Capital is currently allocated across 8 companies, ensuring diversification and risk mitigation.

Short-Medium term business funding: These instruments are listed or unlisted short-medium term debt instruments from various issuers across multiple business sectors including but not limited to Financial Services. These instruments are derived from invoice discounting and or invoice factory practices.
