\*Risk free rate =7.25%

### Asset Allocation Defined

**Industrials:** Investments into South Africa's industrial sector and broader economy, excluding financials, oil & gas, and basic materials. This classification, for instance, includes agriculture. A typical investment would consist of exposure to the farming sector, particularly primary production such as crops, livestock, and essential agricultural inputs.

**Financial services funding:** Capital deployed into businesses operating within the financial sector, typically through unlisted debt or structured funding instruments. These investments offer stable, income-generating opportunities with strong underlying cash flows.

**Long term business funding:** These instruments are unlisted long-term debt instruments from various issuers across multiple business sectors, including but not limited to financial services, local industrial, and local agricultural businesses. These instruments provide predictable income, inflation protection, and low correlation to traditional markets. A typical capital allocation would be in the SME lending sector, insurance, hospitality tech or food and beverage sector, supporting established businesses with growth and working capital funding. Capital is currently allocated across 8 companies, ensuring diversification and risk mitigation.

**Short-medium term business funding:** These instruments are listed or unlisted short-medium term debt instruments from various issuers across multiple business sectors including but not limited to Financial Services. These instruments are derived from invoice discounting and or invoice factory practices.
